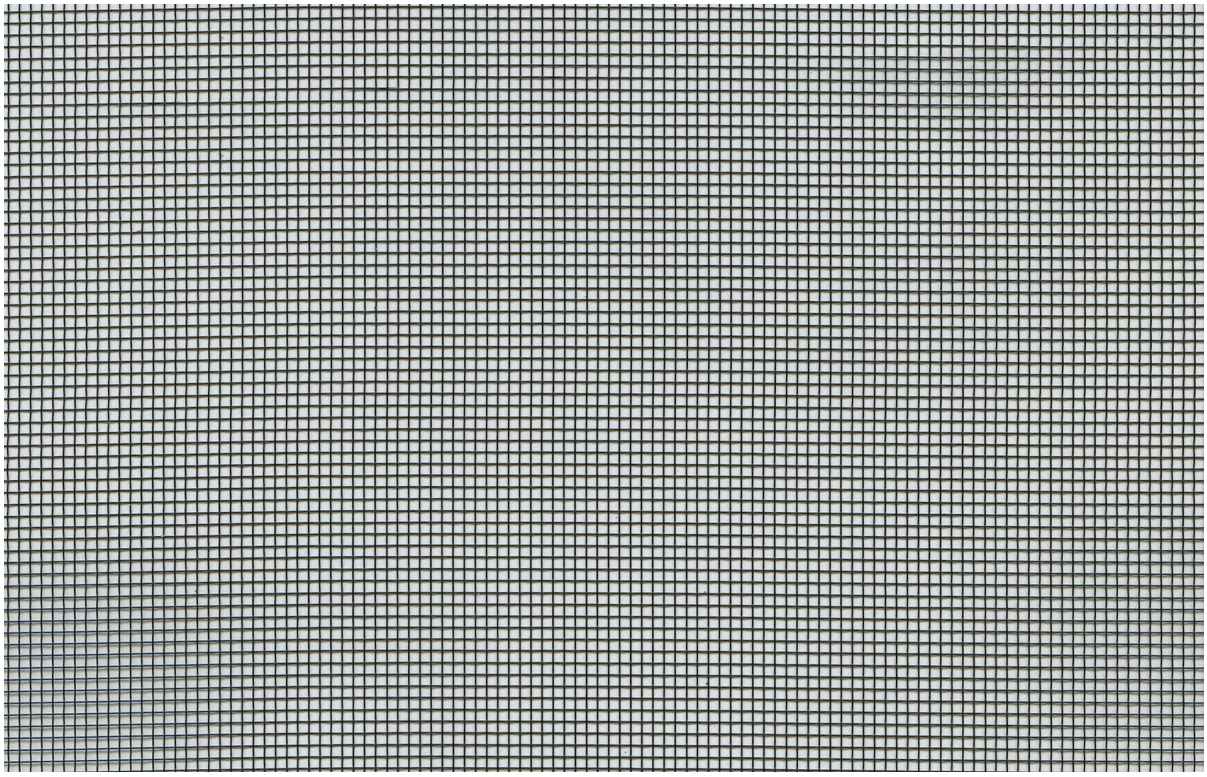
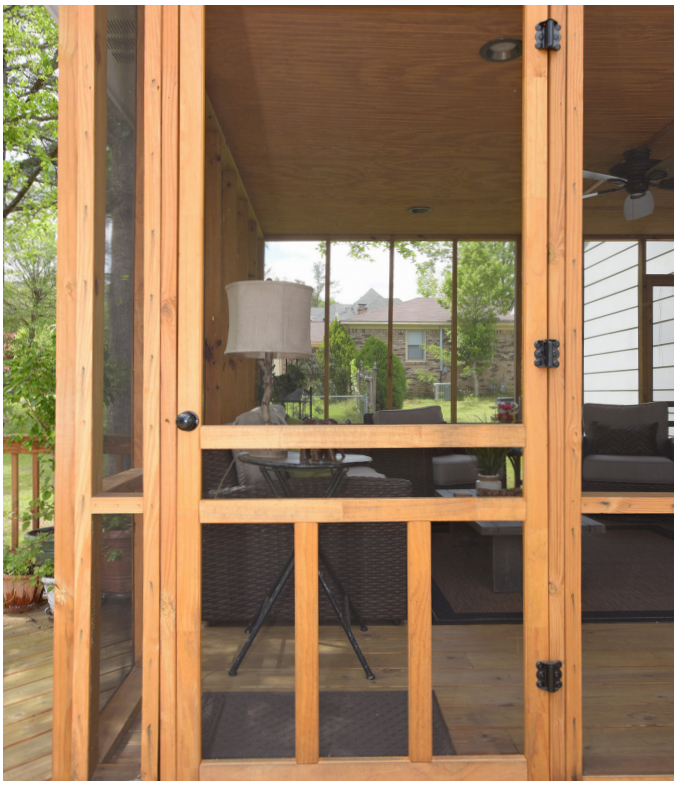
SeeVue®
BY PHIFER



Black



SeeVue® is woven from stainless steel which makes this product much stronger than standard insect screen. Designed to maximize an outward view, SeeVue's fine wire diameter improves visibility by making the view sharper and more brilliant. It allows for superior airflow while meeting a high standard of insect protection. SeeVue is suitable for fabrication in conventional screening applications such as windows, doors and porches and is safe to use with pressure treated lumber. See the view, not the screen with SeeVue improved visibility insect screening.

- Enhanced view for windows and doors
- Durable stainless steel insect screen
- Black powder-coated finish offers improved visibility
